Allowable Subject Matter

2. Claims 71-118 are allowed.
3. The following is an examiner's statement of reasons for allowance: Independent claims 71 and 82 are patentable over the prior art in that they disclose the use of a blocking element in conjunction with a suction-responsive flexible valve to support and maintain the valve in the closed position. Relevant prior art found in Morano (RE37,016), Robbins, III et al (5,706,973) and Belanger (5,890,619) has flexible valves which respond to suction to open but are maintained in the closed position solely by the resilience and memory of the valve material.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
